

CHARACTERISTIC FEATURES TECHNICAL DATA SENSORS EQUIPMENT AF

Professional flue gas analyser that combines high quality of sample conditioning with great measurement accuracy. The device is contained in a compact soft casing.

Analyser is equipped with heated hose with heated filter and a built-in highly efficient condensation dryer. It can be fitted with up to 9 sensors (electrochemical cells and NDIR sensors).

It has built-in pressure sensor, large internal memory for results and built-in ribbon printer for standard (non-thermal) paper. The device meets standards of EN 50379.

CHARACTERISTIC FEATURES TECHNICAL DATA SENSORS EQUIPMENT APPEARANCE

- Equipped with up to 7 electrochemical cells
- Equipped with up to 2 NDIR sensors
- Built-in 58mm ribbon, graphic printer
- Built-in rechargeable battery for up to 8 hours of operation (heated hose and gas dryer require AC power)
- Built-in Peltier dryer with peristaltic pump for condensate removal
- Equipped with heated hose with built-in heated gas filter
- Heated hose with standard M30x1 fitting, fits all madur gas probes with K-type thermocouples
- Additional gas filter with condensate trap
- Differential pressure sensor for measurements of chimney draft and flow velocity (with help of Pitot tube)
- Soot measurement programme
- Measurements of gas and ambient temperatures, optionally 2 additional inputs for temperature sensors
- Analogue outputs (4-20mA / 0-10V) optional
- Built-in large memory for results, two formats of data savings
- · Calculations of many combustion parameters
- · Calibration of electrochemical sensors allowed to user

CHARACTERISTIC FEATURES TECHN	IICAL DATA	SENSORS	EQUIPMENT	APPEARANCE	
Dimensions (W * H * D)		470 mm * 310 mm * 160 mm			
Weight (without accessories)		12,0 ÷ 12,8kg			
Casing material	Alun	Aluminium padded with foam and fabric (polyester)			
Operating conditions	T:	T: 10°C ÷ 50°C, RH: 5% ÷ 90% (non-condensing)			
Storing temperature	0°C ÷ 55°C				
Power supply: input maximal power consumption	า 115	115 VAC or 230 VAC 90 W (without heated hose)			
Battery: type work time charging time	Le	Lead-acid, rechargeable 12V / 2,2Ah 7h 14h			
Data memory: size number of results	32k	32kB 30 reports + 10 banks (1024 sets of data)			
Display	Graphical LCD 128 * 128, with variable contrast and backlighting				
Printer	High-speed dot matrix, graphic printer for 57 mm normal paper				
Analogue outputs (optional)	Two current (0/4 ÷ 20mA) or voltage (0 ÷ 10V) outputs				
Gas pump gas flow	Diaphragm, max 2l/min (with automatic flow control) 90l/h (1,5l/min)				
Purging pomp for CO sensor	Diaphragm, max 1,5l/min				
Communication interface with PC computer	RS-232C				
Gas filtering	 Heated filter included in the heated hose Built-in final filter (behind the gas dryer) with replaceable insert 				

BUILT-IN GAS DRYER, HEATED HOSE DRIVER, HEATED HOSE

Drying method	Water condensation by rapid cooling down		
Cooler type	Based on Peltier element		
Cooler temperature	+5°C electronically stabilised		
Cooler temperature hysteresis	~ 1°C		
Maximum gas flow for efficient drying	100 l/h		
Condensate pump	Peristaltic, 38 ml/min		
Heated hose temperature	+120°C electronically stabilised		
Heated hose temperature hysteresis	~ 5°C		
Heated hose length	3m (optionally 5m or 10m)		
Heated hose power consumption	360W (max)		
Heated hose thermocouple wires	K-type (S-type optionally)

CHARACTERISTIC | FEATURES | TECHNICAL DATA | SENSORS | EQUIPMENT | APPEARANCE

STANDARD EQUIPMENT SUPPLIED ALONG WITH THE DEVICE

- 3m mains cable (type of plug to be selected)
- Heated hose of selected length and supply voltage with heated filter and carrying bag
- Single gas filter with condensation trap and filter insert (pore size 5µm)
- Condensation container
- 2,5m RS-232C communication cable with DB9 female connector
- Software CD with programmes and manuals
- Quick coupler for the pressure sensor fittings (2pc.)

ADDITIONAL EQUIPMENT

NECESSARY FOR THE ANALYSER TO WORK

· Heated hose

Heated hose with heated gas filter supplies gas sample to the the analyser's conditioning module.

Hose has M30x1 threaded connection to fix gas probe pipe. The other end has magnetic quick coupler and electric connector to connect it to the analyser. Standard length of the hose is 3m, it is possible to order other lengths of hoses. The hose is provided with a carrying bag.

CHARACTERISTIC FEATURES TECHNICAL DATA SENSORS EQUIPMENT APPEARANCE

· Gas probe pipe

Gas probe is immersed in the gas duct and is supposed to extract the gas sample and to measure its temperature.

Exchangeable probes are easily connected to probe holders (with M30x1 fastening) and to heated hoses. They have a threaded fixing cone and a thermocouple type K (in some configurations type S) for measurement of gas temperature.

There are many probe pipes available. They differ in length and working temperature. For work efficiency it is advised to own different probe pipes to be able to adjust to the measurement place.

OPTIONAL EQUIPMENT & SPARE PARTS

• Ambient temperature sensor

This ambient temperature sensor on a 3m cable is used for measurement of the boiler's inlet air. In basic configuration the ambient temperature is measured by sensor installed in the connector of the gas probe handle. ordering code:

Z40P-SENS-TEMP

Pitot tube

Pitot tube is an accessory that allows to perform measurement of the flow velocity of the gas stream. The measurement is performed indirectly – Pitot tube is connected to analyser's differential pressure sensor. Analyser recalculates the differential pressure on the Pitot tube's outlets to velocity.

A few lengths of tubes are available. Pitot tube has 2m gas tubings to connect it to the analyser.

ordering codes: pitot tube 800mm - Z00-PITOT-8002 pitot tube 500mm - Z00-PITOT-5002

RS232C to USB converter

2.5m cable that allows to connect the analyser (its RS232C port) with USB port in PC computer (especially valuable when PC is not equipped with COM port).

ordering code: Z40P-USB-ADAP

• Bluetooth communication module

Module connected to the analyser's RS232C port, allows to communicate with PC computer over Bluetooth protocol. ordering code:

Z40P-BLUE-TOOTH

Soot test adapter
 Soot test adapter is installed in place of the standard lid.

Adapter allows to perform soot test according to Bacharach method.
