

KANE-SCM2

Boiler Emissions Semi Continuous Monitoring

Semi Continuous Emissions Monitoring

Accurate long term emissions analysis with your KANE analyser

- Take your KANE978, 988 & 988+ to the next level
- As KANE SCM plus:
- Perform long term environmental compliance testing
- Accurately test NO₂ & SO₂ emissions with KANE-GCU gas conditioning unit
- See, save & send results to KANE LIVE app
- Only use when needed - analyser still available for short term monitoring

Applications:

- Long term boiler emission monitoring
- Efficiency, performance & pollution tests
- Diagnose boiler performance issues
- Meet environmental pollution requirements

*Analyser firmware may need update - call if unsure
